

When a fragile ecosystem experiences toxicity poisoning...

FIGHT TOXICITY WITH THE BEST IN TECHNOLOGY
(to learn more visit vancouverfootspa.com)

...it starts to shutdown.

Don't let toxicity build up to the point where it threatens your health.

With an ionic foot detox spa you can actually see the released toxins from your system

The shocking part is - everyone has toxicity.

So does your body.

There is a solution.

Cleanse with a detox foot spa.

How does it work?

The Detox Foot Spa is the modern version of an ancient concept of healing. A Detox Foot Spa session involves purging the contents of the sweat glands (a similar concept to infrared saunas in that sweating is a form of detoxification.) There are 2,000+ sweat glands in each foot - more than anywhere else in the body.

What can I expect to feel?

While each person's experience is entirely different (according to the type of toxins and which systems of the body have been stressed), most people experience a re-balancing period directly after the session. While you can resume normal daily activities following your session, it is recommended that you allow some time to rest.

A lifetime of toxins can be removed in five to ten sessions.

Remove toxins & health issues from your life

The more stressed we are and the more stressed our bodies are, the more likely we are to have a health breakdown.

“My daughter was diagnosed with autism. After foot spa sessions her verbal and tactile issues which interfered with her learning abilities have improved dramatically.”
- Emma C.

“Following a H1N1 vaccination shot, I suffered for 9 months with a painful red rash that covered 90% of my body. In only 6 sessions the rash was gone and I could put my clothes on without pain.”
- Danny L.

“For 10 years I have dealt with the pain and discomfort of neuropathy. Symptoms include painful feet and discoloration of the lower leg. Allan suggested the foot-spa and after only 6 sessions I have seen a significant improvement in my legs.”
- Tom C.
